Central Board of Secondary Education
Sanskar Academy School, Pachore

PROJECTS

- Analyzing the Growth of Indian start-up**
This project is analyzing the funding ecosystem of the Indian start-up. How will they get funding from investors and what are the most preferred startup for
- Customer Segmentation for Marketing Analysis**
Divide the customer base into several groups of individuals that share a similarity in different ways that are relevant to marketing such as gender, age, interests, and miscellaneous spending habits
- Stock Market Prediction**
This is a fully functional stock market prediction using a fbprophet (python module) to predict the next 10 days' closing price. Django framework of python is used for backend and HTML, CSS and Bootstrap are used for front-end design.
